

# E-CITATION INTERFACE

## AUTOMATE THE TRANSFER OF E-CITATIONS INTO IN-SYNCH RMS

***IN-SYNCH*RMS**

The In-Synch RMS E-Citation Interface reduces the duplication of data entry, saving your agency valuable time and resources. Imported citations can create new call-for-service records or link to existing call-for-service records in your In-Synch RMS database. The E-Citation Interface has built-in logic to use existing data to populate the vehicle, driver, owner, and address information, further enhancing the In-Synch RMS master indexes. This logic can also create new records when data isn't available from existing records in the RMS.
