

## APPLICATIONS FOR YOUR WHOLE DEPARTMENT

In-Synch RMS includes applications for everyone in your department. Officers can use our **Call Log** and **Case Builder** applications to record calls-for-service and investigations. Supervisors can use our **Admin Review** application to approve or reject case reports and supplements. Detectives can use our **Link Finder**, **Master Indexes**, and **Data-sharing** applications to discover links between data, which can help solve crimes. Specialists can use our **Alarm Billing**, **Fleet Management**, or **Evidence Management** applications to complete their daily tasks. So, whether you are an officer, supervisor, property tech, investigator, clerk, or some other specialist, In-Synch RMS has an application for you.

OFFICERS

SUPERVISORS &  
ADMINISTRATORS

DETECTIVES &  
INVESTIGATORS

SPECIALISTS

## OFFICERS

**Call Log** - Write and review basic reports about calls-for-service. Call Log integrates with many CAD systems for improved efficiency.

**Case Builder** - Create media-rich case files, including photos, multi-officer narratives, arrests, evidence, external files, and custom fields.

**Daily Log** - Officers can record their daily activity information, including odometer readings, fuel stops, and other events throughout their shift.

**Person Management** - Quickly lookup or enter person information, including notes, photos, physical descriptors, officer safety, known associates, aliases, etc.

**Organization Management** - Quickly lookup or enter organization information, including notes, photos, officer safety, organizational contacts, affiliations, etc.

**Vehicle Management** - Quickly lookup or enter vehicle information, including notes photos, officer safety, insurance policies, owner or lessee information, etc.

**Address Management** - Quickly lookup or enter address information, including notes, photos, officer safety, etc.

## SUPERVISORS & ADMINISTRATORS

**Administrative Review** - Manage the flow of cases in your agency by making sure they are submitted promptly. Supervisors can review and approve or reject an officer's work, leave review notes and due-back dates, and create supplemental assignments. Personnel can create monthly UCR/NIBRS/CLERY reports.

**Admin Reports** - Generate statistical reports on calls, cases, arrests, citations, warrants, racial profiling, etc.

**Personnel Management** - Track training, equipment, notations, and other personnel information.

**Security Management** - Create user logins and security rights for the In-Synch RMS suite of applications.

**Picklist Management** - Edit various pick lists throughout the In-Synch RMS software suite to match your agency's terminology.

**Intersection Management** - Manage the intersections for your jurisdiction in calls-for-service, case reports, citations, etc.

**Zip Code Management** - Manage the Zip Codes associated with addresses and locations.

## DETECTIVES & INVESTIGATORS

**Confidential Informants** - Track sensitive informants by number, including involvement and payments.

**Query** - Create advanced ad-hoc queries to find information or data points within the In-Synch RMS database.

**Link Finder** - In-Synch RMS provides an interactive visual querying tool, allowing users to find connections between items in their data.

**Master Indexes** - Self-building master indexes display a complete history for address, organization, person, property, and vehicle items in the database.

**Data-Sharing** - Share summary master index information on persons, organizations, locations, property, and vehicle items with other co-operating departments.

**Master Phone Index** - Quickly find person and organization records by searching partial or complete phone numbers locally or through the data-sharing network.

**Photo Management** - Create photo lineups, missing person, and wanted person posters. Print any system photos.

## SPECIALISTS

**Court Papers** - Record, track, and print document details and paper service history for civil and criminal documents such as subpoenas, writs, petitions, warrants, orders, or other custom paper types.

**Property Room & Evidence Management** - Manage your property's inventory and custody chain, including barcode support.

**Fleet Management** - Track details about your fleet, including maintenance schedules and quick statistics.

**Criminal Citations** - Record Criminal Citations, including arrest clearances, court resolutions, and payments.

**Traffic Citations** - Record Traffic Citations, including payments and court resolutions. Interfaces with various E-Citation systems.

**Warnings** - Record Traffic Warnings. Users can escalate aged warnings into citations.

**Parking Tickets** - Record Parking Tickets with automated late fees. Users can escalate unpaid tickets into citations.

**Warrant & Registration Management** - Enter or view a person's warrants, drug, sex, arson offenses, parole, probation, and incarceration records, or carry concealed weapons permits.

**Custody Management** - Track the details of temporary custody assignments, including short-term detainments and transports.

**Pawn Shop** - Record pawn transactions. Track hotlist items.
